

Programme to treat and prevent reinfection following a diagnosis of Streptococcus

RACE PROGRAMME 3 OPTION 1

| Mixed into Food | Week Day | In Drinking Water | |
|--|------------------|---|--|
| Turbobooster E-Powder Bloomford F-Vite & Grit | Saturday | Quik Gel drink for race & toss birds PM - Moxi-T Megamix | Smaller, more dry Sunday morning droppings tending to brown indicates a positive response and need to start Moxi-T & Megamix on Monday. |
| Turbobooster E-Powder Ve8 Powder Bloomford | Sunday | Moxi-T Turbosole Megamix | Sunday morning dropping check Larger, softer and any green droppings is a negative response to Moxi-T. These negative changes mean it is time to test the health of race team using KD. |
| Turbobooster E-Powder Ve8 Powder Bloomford | Monday | Moxi-T Turbosole Megamix | Monday morning dropping check Smaller, dry Monday morning droppings following Moxi-T Turbosole Megamix treatment indicates this programme should be repeated next week. Give KD Monday morning when droppings are larger or green. |
| F-Vite & picking stone in dish | Tuesday | AM - Moxi-T Turbosole Megamix PM - KD | Smaller, more dry Tuesday morning droppings means an extra day of Moxi-T Turbosole Megamix is needed. KD treatment is given Tuesday afternoon to check the health of the race team and decide next week's programme. |
| PM - Remove F-Vite, grit & picking stone | Wednesday | Dufoplus Ioford Megamix | |
| E-Powder in a dish | Thursday | Ioford Megamix | |
| E-Powder in a dish | Friday | Quik Gel | |
