F-Vite & Picking Stone in a dish	Day 6	Fresh water or Megamix
Turbobooster E-Powder Bloomford	Day 7	Fresh water or Megamix

As weanlings are moved into race loft:

- PMV Vaccination

- Ve8 Powder, Bloomford & Turbooster are added to the food & Quik Gel into the drinking water for 2 days.

- During this time monitor eye blink & dip beaks in drinking water container if required. Teach weanlings to enter trap and encourage them to walk around outside the loft with old birds. Herd young birds into loft to eat before old birds enter so that can eat their full without interruption.

- Start Weaning Programme on the third day after being removed from parental care. Continue this programme for 2 weeks. At this time the weanlings go onto the Pre-Race Young Bird Programme.
