

For lofts diagnosed with
Chlamydia, Mycoplasma, E.coli & wet canker

RACE PROGRAMME 1 OPTION 1

Mixed into Food	Week Day	In Drinking Water		
Turbobooster E-Powder Bloomford F-Vite & Grit	Saturday	Quik Gel drink for race & toss birds PM Resfite SulfaAVS Megamix		Smaller, more dry Sunday morning droppings tending to brown indicates a positive response. Resfite, Sulfa AVS & Megamix is repeated on Monday.
Turbobooster E-Powder Ve8 Powder Bloomford	Sunday	Resfite SulfaAVS Megamix	Sunday morning dropping check	Larger, softer and some green droppings is a negative response. Although bloom may be present, these negative changes mean KD is given on Sunday. The Monday morning droppings after KD then tell what if any further treatment is required.
Turbobooster E-Powder Ve8 Powder Bloomford	Monday	AM Resfite Turbosole Megamix PM - KD	Monday morning dropping check	Smaller, dry Monday morning droppings showing a white capping indicates Resfite Turbosole Megamix should be given on Monday. Give KD full dose when droppings are larger.
F-Vite & picking stone in dish	Tuesday	Carlox S76, GTwormer rotations		Smaller, more dry Tuesday morning droppings indicates a positive response to KD and need to repeat the same programme next week
PM - Remove F-Vite, grit & picking stone	Wednesday	Dufoplus Ioford Megamix	Final morning dropping check	Green Wednesday morning droppings are a negative response to KD meaning the time for Natural Programmes is near. Give Resfite & Megamix next Saturday afternoon to confirm the Natural Programme is now the best choice.
E-Powder in a dish	Thursday	Ioford Megamix		
E-Powder in a dish	Friday	Quik Gel		These small, dry perfectly formed droppings will miraculously appear on basket day following the health tonics given from Wednesday to basket day.
