

## RACE PROGRAMME 3 OPTION 2

| Mixed into Food | Week Day | In Drinking Water |
|-----------------|----------|-------------------|
|-----------------|----------|-------------------|

Turbobooster  
E-Powder  
Bloomford  
Fvite & Grit

**Saturday**

Quik Gel drink for  
race & toss birds

PM - Moxi-T Megamix

Smaller, more dry Sunday morning droppings tending to brown indicates a positive response and need to start Moxi-T & Megamix on Monday.

Turbobooster  
E-Powder  
Ve8 Powder  
Bloomford

**Sunday**

Moxi-T  
Megamix

Sunday  
morning  
dropping  
check

Larger, softer and any green droppings is a negative response to Moxi-T. Although bloom may be present these negative changes mean it is time to give KD.

Turbobooster  
E-Powder  
Ve8 Powder  
Bloomford

**Monday**

AM - Moxi-T  
Megamix  
PM - KD

Monday  
morning  
dropping  
check

Smaller, dry Monday morning droppings following Moxi-T treatment indicates this programme should be repeated next week. Give KD Monday morning when droppings are larger or green.

F-vite & picking  
stone in dish

**Tuesday**

Medication option  
S76, GT wormer or  
Carlox

Smaller, more dry Tuesday morning after KD means a health issue remains.

Green droppings after KD treatment indicates it is time to stop this programme and change to another.

PM - Remove  
F-vite, grit &  
picking stone

**Wednesday**

Dufoplus  
Ioford  
Megamix

E-Powder  
in a dish

**Thursday**

Ioford  
Megamix

E-Powder  
in a dish

**Friday**

Quik Gel

### Tuesday Treatments

KD is given Tuesday morning following a negative dropping response to Moxi-T Megamix. Otherwise S76, Carlox & GTwormer are given as a weekly rotation on Tuesday morning and KD is given every Tuesday afternoon.

S76 (5mls per 2 litres) is given one week, followed by GT wormer (5mls per 2 litres) the next. S76 or GT wormer (5mls per 4 litres) is added to the weekly bath water on alternate weeks.

Carlox is given once a month the Tuesday after GTwormer treatment. When coccidiosis is diagnosed, an initial dose of Carlox (2mls per litre) is given for 2 days. Carlox is then repeated each Tuesday morning for 3 additional weeks.

S76 & GTwormer are not given at this time but restart at the conclusion of this treatment.
