

For lofts recently diagnosed with  
Staphylococcus or Streptococcus Infections

## RACE PROGRAMME 3

Mixed into Food	Week Day	In Drinking Water		
Turbobooster E-Powder Bloomford F-Vite & Grit	<b>Saturday</b>	Quik Gel drink for race & toss birds  PM Moxi-T Megamix		Smaller, more dry Sunday morning droppings tending to brown indicates a positive response. Moxi-T & Megamix are repeated on Monday.
Turbobooster E-Powder Ve8 Powder Bloomford	<b>Sunday</b>	Triple X SulfaAVS Megamix	<b>Sunday morning dropping check</b>	Larger, softer and some green droppings is a negative response to Moxi-T. Although bloom may be present, these negative changes mean it is time to change to the regular Race Programme 1, 2 or Natural.
Turbobooster E-Powder Ve8 Powder Bloomford	<b>Monday</b>	Moxi-T Turbosole Megamix	<b>Monday morning dropping check</b>	Smaller, dry Monday morning droppings showing a bright snow white capping following Moxi-T treatment indicates this programme should be repeated next week. Give Turbosole Megamix Monday morning when droppings are larger.
F-Vite & picking stone in dish	<b>Tuesday</b>	AM - Moxi-T, Turbosole & Megamix  PM - KD		Smaller, more dry Wednesday morning droppings indicates a positive response to KD and need to continue this programme next week.
PM - Remove F-Vite, grit & picking stone	<b>Wednesday</b>	Dufoplus Ioford Megamix	<b>Final morning dropping check</b>	Green Wednesday morning droppings are a negative response to KD. This indicates the time to change to Race Programme 2 option 1 next week.
E-Powder in a dish	<b>Thursday</b>	Ioford Megamix		
E-Powder in a dish	<b>Friday</b>	Quik Gel		Top form droppings. These perfect droppings will miraculously appear on basket day when Wednesday to basket day health boosters are given.

### Additional Treatments

On Tuesday:

Tuesday morning is usually the last day of medications. However MoxiT Megamix is continued in the afternoon.

For Coccidiosis:

When coccidiosis is diagnosed, Carlox (2mls per litre) can be mixed with Moxi-T, Turbosole, Megamix each Tuesday for 3 repeat treatments.

Rotational treatments of S76, GT wormer may be continued on Tuesday afternoon when needed instead of KD.
